

Auto Haulers (Approved Wheels)

The two predominant sizes utilized on the front axles of auto haulers are the 275/70R22.5 LRJ and the 295/60R22.5 LRJ.

The 275/70R22.5 LRJ is approved for use on a 7.50 inch and 8.25 inch wheel and not for a 9.00 inch wheel.

Some auto haulers are purchasing the 275/70R22.5 LRJ and mounting them on 9.00 inch wheels. The 275/70R22.5 LRJ should never be mounted on a 9.00 inch wheel. This is a misapplication and may cause the tires to come out of service prematurely.
