

TITLE
Problem Statement

Author Name, Affiliation and Email ID:

Keywords

Five most important terms that describe your innovation domain and specific problem area investigated.

Introduction

A brief section that should inform the reader about the relevance of your innovation (100 words)

Literature Survey

This section includes a short history or relevant background of the research area being addressed.

Proposed Solution

The solution that is being proposed how it solves the problem statement mentioned and it's scope.

Proposed Methodology for Validation of the Solution

What methods (simulations test etc.) will be used to validate the effectiveness and outputs of the proposed solution. The full detailed solution is not required during the synopsis phase. A test plan or simulation plan that helps the reader understand the approach to prove the proposed hypothesis is sufficient.
