

TEST RESULTS 175/65 R14

■ RESISTANCE TO HARSH USE (CURB TEST)

- Repeatedly driving over a curb with increasing speeds to find out when the tire gets damaged
- Damage is defined as visual bulge, cut or loss of air (deflation)
- Curb height: 8.7 cm - Edge radius: 8 mm

RESISTANCE TO HARSH USE (CURB TEST) (speed at which visual damages occur [km/h])
